College of Engineering
Department of Aircraft Engineering

Students Outcomes

2026-2025

Students Outcomes- Engineering College - Department of Aircraft Engineering

Knowledge:

- 1 - The ability to distinguish, identify, define, formulate and solve engineering problems through the application of the principles of engineering, science and mathematics.
- 2 - The ability to produce engineering designs that meet the required needs within certain constraints through the application of analysis and installation processes in the design process.

Skills:

- 1 - The ability to create and implement appropriate measurements and tests with quality assurance, analysis and interpretation of results and the ability to geometric judgment to reach conclusions.
- 2 - The ability to communicate effectively verbally with a group of people and in writing with different administrative levels and at different levels.
- 3 - The ability to realize the need to continue the self-development of professional knowledge and how to find and evaluate it properly compiled and applied.
- 4- Ability to work effectively within teams, set goals, plan events, meet deadlines and manage risk.

Ethics:

- 1- The ability to realize ethical and professional responsibilities in engineering issues and make sound judgments that take into account the consequences in the financial, environmental, societal and global fields.
